### ■ Safety is 24/7

Do your employees feel they are working safely for: OSHA... their company and supervisors... or their personal well-being? A risk-free environment will never exist. Therefore, employees must be self-motivated to develop a "personal safety culture" to reduce accidents.

### ■ Safety Leadership Skills: 18 Lessons Learned on the Links

Safety Leadership Skills is a dynamic, entertaining, content filled presentation that connects safety leadership skills and golf terms. Golfers and non-golfers...all genders and ages...will enjoy this fresh and winning approach to improve success at work and in life.

### ■ Building High Performance Teams: Maximize Success and Results

Safety committees can be a profit center if they are established and managed properly. Time is money. Learn to deliver better results in a shorter time with less stress and more support. All attendees develop skills that can be transferred to many aspects of their lives.

### ■ Seven Sins of Safety: Curing Bad Behaviors That are Predictors of Accidents

The Seven Sins of Safety are often behaviors that are precursors of near misses and, even worse, accidents. The Safety Doctor will identify these systemic ailments, provide examples based upon your industry or environment, and prescribe the antidotes to help you recognize and cure the problems in your organization.

### ■ Safety Bull's-eye: Target Your Message to Your Audience

Executives, plant managers and front-line employees all need to be on board for any successful safety program. Learn the techniques of targeting your message to the specific group that will motivate them and gain their support.

### ■ OSHA's Top 10: Solutions to Citations in Your Industry

By addressing the most frequent industry-specific safety violations first, you will have the greatest success in your safety compliance program. Identify the highest risks, and set priorities for your organization. Learn the solutions and corrective actions to implement immediately.

### ■ Safe and Secure Travels: Across Town or Across the Globe.

There are no guarantees for TOTALLY safe travel. However, you can reduce the risks of becoming a victim. Learn tips and techniques to prepare and respond to the unexpected. Use the methods bodyguards and the rich and famous have used for years.
